

# ADJUSTABLE LUNETTE NOW AVAILABLE

If you try to tow an M1101 or M1102 light tactical trailer (LTT) with your MRAP M-ATV, you'll quickly find the trailer's lunette is too low to fit the pintle. The hookup makes the trailer tilt backwards instead of being level.

That tilt throws off the center of gravity. And there's not enough tongue weight to stabilize the trailer. That makes it dangerous to tow.

There's now an adjustable lunette available that allows for level hookup between the M-ATV and LTT. There are six different height adjustments, so you can choose the correct position for your M-ATV's pintle height and tire settings.

The adjustable lunette comes in a kit that includes a height adjustment assembly, safety chain extensions, storage brackets for the old lunette, and installation instructions. The lunette is part of the mortar stowage kit, NSN 2540-01-623-6327.

This lunette is only for the M-ATV and has not been tested with other vehicles. So don't experiment with other trucks!
