

Supply...

FROM SOUP TO NUTS (AND BOLTS)

We know extra nuts, bolts and washers can sure come in handy, especially for do-it-yourself projects, like building a workbench or adding shelves in a tool room.

You can view off-the-shelf inventory with the Defense Logistic Agency's Inventory Locator Network (DILNet). DILNet lists the hardware inventory available to troop support, land, maritime and aviation supply chains from participating vendors. Best of all, it's updated every day.

You can search inventory by NSN or part number. When you find what you need, you can work with a customer account specialist and submit a MILSTRIP requisition. Hardware ships directly from vendors, with shipping times averaging only 8 days.

Another helpful page on the website has fastener, assortment, and nuts and washer catalogs: <https://www.troopsupport.dla.mil/Hardware/Fasteners/>

You also have the option to check availability of your parts or NSNs at:

<https://www.troopsupport.dla.mil/CE/dilnet/CT.asp>

For DILNet customer assistance, call DSN 444-5510, (215) 737-5510, or email:

Urgent Reminder

Never use fasteners to repair or reassemble equipment without first consulting the TM. Use only the exact fasteners called for in the TM. Remember, bolts and screws are precision materials. The wrong ones could snap under stress or not snap when they should. And that could be dangerous, even fatal.
