

30-, 60-kW TQGs...

Identify the Faulty Keypad Assembly

If your keypad falls under one of these contracts, here's how to check if it's covered:

- If the keypad assembly is already installed, remove it in an electrostatic discharge safe area.
 - For 30-kW generators, remove the keypad following the instructions in Steps 1-8 in WP 0050 of TM 9-6115-671-14.
 - For 60-kW generators, remove the keypad following the instructions in Steps 1-8 in WP 0050 in TM 9-6115-672-14.
- Find the label with the "N.E.K." quality assurance stamp. The label may be on the top or back of the assembly.
- Check the date code. The date code on the label is formatted as "MM/DD/YY" (for example, 11/02/07 is 02 Nov 2007).

Look for dated label on side or back of keypad assembly

- If the date code on the label falls between 06/01/12 to 06/30/13, your keypad assembly is eligible for repair. The manufacturer will forward defective keypad assemblies to a supplier who will repair and return them to units free of charge. Contact the following POC to get a return material authorization (RMA) number and further instructions:

Kathryn Santine
Contract Administrator
L-3 Communications Westwood Corp.
12402 E. 60th St.
Tulsa, OK 74146

Or call her at (918) 250-4480 or email: Kathryn.Santine@L-3com.com

- If the date on the label does not fall within the dates in Step 3(a), but the keypad assembly is defective, follow the standard product quality deficiency report (PQDR) process. To submit a PQDR, go to: <https://www.pdrep.csd.disa.mil/>

THE KEYPAD ASSEMBLY CONTROLS NAVIGATION IN THE COMPUTER INTERFACE MODULE (CIM).

IF IT'S FAULTY, ONE CLUE IS THAT THE CIM CURSOR DOESN'T WORK RIGHT. SOMETIMES THE CURSOR WON'T MOVE DOWNWARD OR LEFT AND SOMETIMES IT WON'T MOVE AT ALL.

A TOTAL OF 566 CONTROL BOX KEYPAD ASSEMBLIES WERE DELIVERED AS SPARE PARTS UNDER THE FOLLOWING CONTRACTS IN THESE QUANTITIES...

Contract No.	Qty
SPM7M912V5779	145
SPM7M913V1559	110
