

Stryker...

# STEERING NOT ALL IT'S CRACKED UP TO BE?

Crewmen, is your Stryker's steering wheel giving you a lot of "feedback"? Does the steering bind up or feel slack or loose?

If you're experiencing sloppy steering, tell your mechanic right away. He'll inspect for cracks in the steering bearing flange, as well as in the hull near the left front fender.

**SORRY! MY  
STEERING AIN'T  
DOING SO GREAT!**

Mechanics, check out more details in TACOM Maintenance Action Message 15-015. You'll find it on the TACOM-Unique Logistics Support Applications (TULSA) website:

<https://tulsa.tacom.army.mil/Maintenance/message.cfm?id=MA15-015.html>

You'll need your CAC and first-time users must request access.

Questions? Contact Alexander McArthur, DSN 786-6726, (586)532-6726 or email:
