

**HOW MANY  
DRIVE  
ASSEMBLIES?**

**ONE IS THE  
ANSWER, SIR. THIS  
WILL BE CORRECTED  
IN THE NEXT REVISION  
OF THE TM.**

Dear Half-Mast,

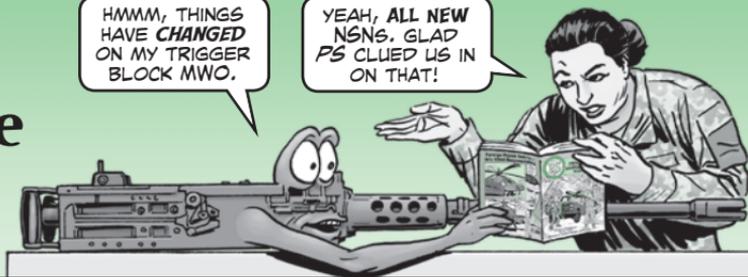

How many electrical drive assemblies is the M326 Mortar Stowage Kit supposed to have? The COEI section of TM 9-2590-527-13&P says two, but the parts section says one.

# NSNs Change for MWO

HMMM, THINGS  
HAVE **CHANGED**  
ON MY TRIGGER  
BLOCK MWO.

YEAH, ALL NEW  
NSNs. GLAD  
PS CLUED US IN  
ON THAT!

Dear Editor,

In order to do MWO 9-1005-213-30-1 for the M2 machine gun, I tried to order a trigger block kit, NSN 1005-01-414-9706, and discovered it was a terminal item.

Research revealed that now you must order these NSNs instead:

- Trigger block, NSN 1005-01-590-7002
- Flat spring, NSN 5360-01-415-3267
- Non-electrical wire, NSN 9505-00-076-8640
- 2 machine screws, NSN 5305-01-415-3269

Small arms repairmen should make a note of this.
