NOTES

1) MIL-PRF-49501, MIL-PRF-63003, MIL-PRF-63004, MIL-PRF-63012, MIL-PRF-63042, MIL-PRF-63045, and MIL-STD-40051B have all been cancelled and can no longer be used or cited in contracts. MIL-STD-40051-1/2 should now be used for document which used to be prepared to the aforementioned specifications.

2) Use MIL-STD-40051-1/-2 in lieu of MIL-PRF-63010 for Generator Set TMs and in lieu of MIL-PRF-82376 for TMs for Training Devices.

3) Document Type Definitions (DTDs) and Stylesheets are available for use with MIL-PRF-63002L(TM) and MIL-PRF-63033C(TM). DTDs and Stylesheets are available at <https://www.logsa.army.mil/mil40051/tmsspecs.cfm>.

4) We have DTDs and stylesheets for use with MIL-STD-40051-1C/2C that will be available on the main 40051 page (<https://www.logsa.army.mil/mil40051/menu.cfm>). DTDs and stylesheets for MIL-STD-40051-1B/2B, MIL-STD-40051-1A/2A, and MIL-STD-40051-1/2 with change 3 are available from the archive link on the MIL-STD-40051 page (<https://www.logsa.army.mil/mil40051/menu.cfm>). They are currently available at the AMC SharePoint Site (<https://hqamc.aep.army.mil/gstaff/amcio/ia/r/p/EPCO2/default.aspx>) but only by EPCO personnel given access. All stylesheets provided are for page-based manuals prepared to MIL-STD-40051-2. For any versions of the DTD for use with versions of MIL-STD-40051-1/-2 prior to change 3, you can check with your command EPCO office or other programs at your command (or other commands). They may have already downloaded these earlier versions prior to the ASRL going down.

5) S1000D, Version 4.0 is now an alternative to MIL-STD-40051-1/-2 per ASAALT memo dated 8 Jul 10. Its use is not mandatory; it may be used when a good business case warrants. If used, MIL-STD-3031 and DI-TMSS-81794 must also be used. You will find more information about S1000D at <https://www.logsa.army.mil/mil40051/S1000D.cfm> including tools and guidance for use. More information will be added as it becomes available.
